

Following the finalization of new regulations by the Department of Education, all institutions of higher education offering programs intended to lead to professional licensure are required to publicly disclose whether completion of particular programs would be sufficient to meet licensure requirements in all states. Specifically, institutions are required to publicly provide:

- A list of all states for which the institution has determined that its curriculum meets the state educational requirements for licensure or certification.
- A list of all states for which the institution has determined that its curriculum does not meet the state educational requirements for licensure or certification.
- A list of all states for which the institution has not made a determination that its curriculum meets the state educational requirements for licensure or certification.

State	Diagnostic Medical Sonography	Respiratory Therapy	Surgical Technology	Veterinary Technology	No Determination	Meets Requirements	Does Not Meet Requirements
